WORK EXPERIENCE

Barista • La Prima Espresso Company PITTSBURGH, PA • JANUARY 2025 – NOW

- Created and wrote a training manual on how to serve drinks and use the espresso machine.

Assistant Software Engineer • Software Engineering Institute PITTSBURGH, PA • JUNE 2023 – FEBRUARY 2024

- Upgraded python application used by the US government to reports cyberattacks. Added new features, tested its security, deployed the app, then coordinated the cut-over with our government client.
- Rewrote team's wiki to be clear, concise, and more detailed, provided writing support to team members.

Technical Consultant • CMU Dietrich Office of Diversity, Equity, and Inclusion PITTSBURGH, PA • SPRING 2022

- Created dashboard for DEI events that streamlines data collection, standardizes data, and uses graphs to inform decision-making.
- Optimized solutions by conducting 30+ stakeholder interviews and user-tests, as well as by creating handover documentation and a product ownership manual.

Video Game Software Engineer • Ichigoichie Games STOCKHOLM, SWEDEN • SUMMER 2020

- Wrote summaries of platforms for wiki and presented findings to the team.
- Led project to pass QA certification for the following stores: Xbox, Steam, and Nintendo. Wrote a QA checklist, performed bug fixes, and implemented automated test server with Jenkins. We passed every certification process on our first try, finishing the project ahead of schedule.
- Added multi-platform support to the game Hexagroove by extending their original C# code.

AWARDS

SURF Creative Writing Fellowship • Carnegie Mellon University PITTSBURGH, PA • SUMMER 2021

- Addressed the lack of computer science fiction by writing a short story which dramatizes the computer science concept of abstraction, informing readers how it shapes our world.
